

WORKSHOP: THE MANY PATHWAYS TO A CAREER IN SCIENCE

Friday, 11 April 3:30pm-5:00pm

UNM SUB Room: Spirit/Trailblazer

Richard A. Weibl (Director, Center for Careers in Science and Technology, AAAS)

Shaping a career in science has never been a solitary experience. Collaborating with mentors and advisors can teach us a great deal. AAAS has a collection of resources and guides that can help aspiring scientists to make the right moves as they navigate the pathways towards a successful career in science. This session, for all students, will demonstrate those resources and the wide range of places where science, engineering, and technology are practiced today.
