

Notes of the wash-up session of the BHSC meeting held at AWE Aldermaston, April 2004.

The following topics were identified as (potential) agenda items for the next meeting of the BHSC;

1. Presentation of a paper on dose response derived from research conducted at a Be-Cu fabrication facility in Reading, Pennsylvania – Mike McCawley
2. Status report on DoE release criteria guidance - Dave Weitzman (?)
3. Status report on OSHA rule making – Mike McCawley (?) / Mandy Edens (?)
4. Status reports on the research projects identified on the “Research Needs Listing”.
5. Reports from the chairs of the sub-committees – George Fulton/Mike Garcia/Mike Brisson.....
6. Presentation of a proposed web-based means of making data available to committee members – John McKenney. (John to expand on this topic as he thinks best).
7. Consideration of how research projects are kick-started; specifically how to get (a) funding and (b) Project Office buy-in.
8. Status report on contact between AWE and HSE Laboratories – Clive Le Gresley / Tony Quinn.
9. Status report on the “former worker program data” report.

It was agreed that Donna Cragle and Marv Frazier be invited to the next BHSC meeting; the former to report on the status of the DoE Registry for former and current (Be) employees (this ties into item 9), the latter to identify the mechanism by which project funding is/can be obtained (this ties into item 7a).

It was agreed that the next meeting would be held during the third week of October (w/c Monday 18th), with the location being either the DoE office in Las Vegas, NV, or the Princeton Plasma Physics Laboratory, NJ, the choice being made by a majority committee decision.
