<b>SNL Excavation Coordinator:</b>		<b>Phone #:</b>		<b>Date:</b>	
<b>Supervisor Authorizing Excavation:</b>			<b>Phone #:</b>	<b>Date:</b>	

## EXCAVATION PERMIT

### Permit Conditions:

1. This permit is task-specific (see page one).
2. This permit is required for each excavation activity over 12 inches or any excavation beneath concrete sidewalks or asphalt.
3. This permit is valid from the proposed start date to the proposed completion date. **The Excavator is responsible for maintaining spotter's marks after permit is issued.** Request a Re-Spot if spotter's marks are not clearly visible.
4. This permit and all attachments **shall be kept at the excavation site** during excavation activities.
5. This permit is **not** intended to be a complete work release document. Other documents or attachments may be required (e.g. Job-site Hazard Evaluation, ER Site work release) prior to work.
6. A competent person (reference: OSHA 1926.651 (k)) is required to inspect the excavation, at a minimum, daily (prior to entry) and following a change in conditions.

### General Requirements:

An Excavation Permit is required for the following activities:

1. Digging, saw cutting, drilling, coring, or trenching into soil, concrete sidewalks, or asphalt to a depth greater than 12 inches or into soil beneath concrete sidewalks or asphalt.
2. Excavation into subsurface soil in buildings beneath slabs greater than two inches.
3. Scraping, blading, or excavation of any area previously undisturbed or that appears to be undisturbed, such as areas covered with native vegetation, and blading or improvements to previously unimproved roads or paths.

### Work With Caution:

SNL has taken reasonable steps to identify hidden hazards for the identified work location. The possibility exists, however, that unidentified hazards may be encountered. To mitigate risk, the Excavator is responsible for completing a site investigation utilizing methods that would **not** penetrate hidden hazards (e.g. visual inspection) prior to performing excavation activities identified on this permit, and using appropriate caution when utility locations cannot be identified. The excavator shall verify location of utilities by hand-digging or pot-holing within 5 feet of spotted utilities.

**Workers assigned this activity shall wear the appropriate personal protective equipment, and use equipment that is in good working order and properly grounded.**

### Suspending Work!

Any and all individuals working under this permit are authorized and required to **stop any work** activity if:

- Conditions differ from those that have been investigated.
- Unusual odors are discovered during penetration activities.
- Soils are stained
- Buried debris or visible signs of contamination are observed.
- There is any question about the validity of this permit or accuracy of the spotting or utility location.
- Immediately notify the SNL Excavation Coordinator (e.g. Construction Observer) for instructions.

### System Contacts:

In the event of an <b>EMERGENCY:</b> Dial 911 or 845-0911 for cellular phones	In the event of an <b>EMERGENCY</b> during off-hours: Dial 844-8881 or 844-3842
