ARTICLES FOR PROCESS AND FABRICATION LABORATORY PROCUREMENT

1. GENERAL PRODUCT REQUIREMENTS
   Unless otherwise specified in this procurement or superseded by specific drawing requirements, all product submitted to Sandia for acceptance shall meet the requirements of Sandia Specification 9900000 - General Requirements And Drawing Interpretations. Product must be adequately packaged for safe delivery to destination.

2. INSPECTION REPORTS
   An inspection report covering items of purchase must be submitted with each shipment of material. The contractor must select an inspection procedure and sampling plan to insure product(s) will meet the specifications. This inspection report must contain the purchase number, item number, nomenclature, drawing and specification number, issue, drawing dimensions and tolerances, and the actual readings recorded by the Contractor's inspector. Positional Tolerance dimensions must be recorded in X and Y dimensions and the Positional Deviation.

   In the event normal inspection techniques cannot be used, the Contractor shall discuss the exception with the Sandia Contracting Representative and state the circumstances on his inspection report. Parts inspected must be identified and referenced on the inspection report. Whenever product deviates from drawings and/or specifications, contractor shall notify Sandia Contracting Representative prior to shipment of product. Record any action taken by Sandia regarding the deviation on your inspection report.

3. WELDING REQUIREMENTS - CLASS II
   The applicable specification, Steel 9912119, or Aluminum 9912117, covering the welding to be performed on the product being purchased under this procurement includes the following:

   (A) Qualification of welders and welding operators by an approved certifying agency.
   (B) Inspection: 100% visual inspection
   (C) Qualification of penetrant inspection personnel by an approved certifying agency.
   (D) Written certification to accompany the product.

4. WELDING REQUIREMENTS - CLASS I
