Eubank Gate Security Improvement Project

Construction is set to begin on a 12-month road project on Kirtland Air Force Base west of the Eubank gate to address security concerns. The resulting realignment at 20th St. and G Ave. will also provide access to the new NNSA Albuquerque Complex when complete.

Eubank gate will remain open, however, those who live, work, and provide services to the base could experience impacts.

Construction is scheduled to start October 1.

- Starting Oct. 21, those that currently access the base through the SNL contractor gate will need to use the KAFB contractor gate (located west of the Carlisle gate).
- Eubank gate will remain open during construction to commuters.

Project Information
The construction schedule will be available on the KAFB app and website.

www.kirtland.af.mil

To minimize traffic congestion during construction, KAFB and Sandia are:

- Keeping Eubank gate operational during construction.
- Diverting contractors and suppliers to the KAFB contractor gate, near the Carlisle gate.
- Developing a traffic safety plan and deploying signage in the area.
- Working with the City of Albuquerque on traffic flow.
