

Jeff K. Heath

Infrastructure Operations Associate Laboratories Director

As Associate Laboratories Director for Infrastructure Operations, Jeff supports the laboratories objectives by providing clean, well maintained, and operable facilities, lifecycle capital asset management, and comprehensive security services.

Jeff joined Sandia April 2022; prior to joining Jeff functioned in multiple senior level roles at Los Alamos National Laboratory, Idaho National Laboratory, and Naval Nuclear Laboratory. At each of these laboratories, Jeff has facilitated strategic level portfolio integration and developed sustainable, value-added organizations aimed at meeting the mission requirements of the respective laboratory.

Jeff holds multiple degrees in engineering and business management, with his PhD in Biological Engineering. He is a licensed Professional Engineer and has multiple certifications in industrial and systems engineering, leadership, and project management and controls. Jeff loves learning and teaching, with almost two decades of instruction as adjunct and affiliate faculty for several Idaho colleges and universities, teaching coursework in Engineering Design, Nuclear Facility Management, Project Management, and Instructional Design.
