

GRANT OPPORTUNITY

\$500-\$3000 | Deadline: October 17, 2022

Success in Climate Change Education for K-12 Youth

Sandia National Laboratories is now accepting applications for its Success in Climate Change Education for K-12 Youth grant for the 2022-2023 academic year. Climate change is an urgent and growing threat to national and global security—one that Sandia is committed to addressing through science, technology, and action.

Grant amounts range from \$500 to \$3000 for out-of-classroom time/extended learning programming (i.e., afterschool, inter-sessions or other out-of-classroom time) in which students explore, innovate, and take action in the local community's pathways toward net zero energy and greenhouse gas emissions. This grant opportunity is open to non-profit organizations in Alameda, South San Joaquin, and East Contra Costa counties who provide educational services to K-12 youth. Organizations who have not already received an education grant award from Sandia in the current fiscal year are highly encouraged to apply. The purpose of this grant is to support learning and development in climate action programs and projects in the following areas:

- Energy efficiency
- Greenhouse gas emission reduction
- Carbon Pollution Free Energy
- Microgrids
- Zero / low emission transportation
- Electrification & Decarbonization
- Carbon Sequestration
