

Chase Carpenter

Vice President, Chief Information and Product Security Officer, Honeywell

Board of Managers, National Technology and Engineering Solutions of Sandia, LLC

Chase Carpenter is the Chief Information and Product Security Officer for Honeywell.

Mr. Carpenter leads all security work across the company. He joined Honeywell in 2019 to establish a high performing, risk-based security organization that can keep Honeywell safe from all manners of threats and attacks. He is responsible for securing customer-facing products and services, safeguarding Honeywell's internal IT systems, data, and infrastructure, and providing physical security to protect people and facilities.

Mr. Carpenter joined Honeywell from Microsoft, where he spent 20 years in a variety of security related roles, spanning from development of security technologies to running security for the Windows, Devices, and Gaming organizations. He is active in the security community as a governing body member for the Evanta Chief Information Security Officer (CISO) community, and a participant in numerous security organizations including the Security 50, Information Security Sharing Forum (ISSF), and multiple Information Sharing and Analysis Center (ISAC) communities.

Mr. Carpenter holds a Bachelor of Science in Computer Science from the Georgia Institute of Technology.
