

# Curriculum Vitae

Jaideep Ray, Distinguished Member of the Technical Staff  
Data Science & Analytics, Sandia National Laboratories  
MS 9152, P.O. Box 969, Livermore, CA 94551-0969.  
Phone: (925) 294-3638; Fax: (925) 294-2234  
Email : jairay@sandia.gov  
URL : <https://www.sandia.gov/~jairay>

## Education

Ph.D. in Mechanical and Aerospace Engineering, Rutgers, the State University of New Jersey, October 1999.

M.S. in Mechanical and Aerospace Engineering, Rutgers, the State University of New Jersey, January 1997.

B. Tech. in Aerospace Engineering, Indian Institute of Technology, Kharagpur, West Bengal, India. June 1992.

## Experience

2013 – present	Distinguished Member of Technical Staff, Sandia National Laboratories.
2004 – 2013	Principal Member of Technical Staff, Sandia National Laboratories.
2000 – 2004	Senior Member of Technical Staff, Sandia National Laboratories.
1999 – 2000	Limited Term Member of Technical Staff, Sandia National Laboratories.
1993 – 1999	Graduate Research Assistant, Rutgers, the State University of New Jersey.
1992 – 1993	Hydraulics Design Engineer, Eicher Tractors, India.

## Research Interests

- Bayesian inverse problems and scalable numerical methods to solve them; multiscale random field models; forecasting & prediction; machine-learning
- Parallel computing and component-based design of scientific simulation software
- Higher-order numerical methods for PDE solutions on adaptively refined meshes.
- Computational and theoretical fluid mechanics, with emphasis on compressible and reactive flows.

## Research Projects, Contracts and Grants (as PI)

1. “Fundamental improvements to radiological data fusion”, funded by National Nuclear Security Administration, Office of Defense Nuclear Nonproliferation Research and Development, Sandia PI for a joint project with Lawrence Berkeley National Laboratory over October 2023 – September 2026.

2. “EMERGE: ExaEpi for elucidating Multiscale Ecosystem complexities for Robust, Generalized Epidemiology”, funded by Office of Science, Advanced Scientific Computing Research, over September 2023 – August 2025.
3. “Calibration Techniques and a High-Performance Computing Workflow for Disease Models”, funded by Office of Science, Advanced Scientific Computing Research, over September 2022 – August 2024.
4. “Radiological Data Fusion for NA-22”, funded by National Nuclear Security Agency, Office of Nonproliferation (NA-22), Sandia PI for a joint project with Lawrence Berkeley National Laboratory and Los Alamos National Laboratory. October 2022 – September 2023.
5. “Statistical modeling and forecasting”, funded by funded by US Department of Defense/Army Research Laboratory. Sandia PI of a joint proposal with Virginia Tech - Applied Research Center (PI: Ms. K. Cheng), over June 2019 – May 2020.
6. “Conditioning multi-model ensembles for disease forecasting”, funded by DoD/Defense Threat Reduction Agency, over October 2016 – September 2018.
7. “A scalable multi-chain MCMC method for high-dimensional statistical inverse problems”, funded by Office of Science, Advanced Scientific Computing Research, over September 2013 – August 2016.
8. “Evaluating time-series analyses of event-based public health surveillance”, US Department of Defense / Defense Intelligence Agency / National Center for Medical Intelligence, over January 2012 – December 2012.
9. “Biosurveillance of Partially Observed Epidemics”, funded by US Department of Defense/Defense Threat Reduction Agency. Sandia PI of a joint proposal with Applied Research Associates (PI: Ms. K. Cheng), over June 2009 – May 2012.
10. “Epidemic Evolution Simulations”, funded by Department of US Defense/Defense Threat Reduction Agency. Sandia PI of a subcontract from Applied Research Associates (PI: G. McClellan), in 2008.
11. “PARADIGM: Principled Approaches to Research and Development of Innovative Generative Models”, Laboratory Directed Research & Development, \$1900K over October 2024 – September 2025.
12. “A spatially regularized detector for emergent/re-emergent disease outbreaks”, Laboratory Directed Research & Development, \$720K over October 2021 – September 2023.
13. “Verification of Data-Driven Models of Physical Phenomena using Interpretable Approximation”, Laboratory Directed Research & Development, over October 2019 – September 2021.
14. “Online mapping and forecasting of epidemics using open-source data”, Laboratory Directed Research & Development, over October 2013 – September 2016.

15. “Kalman-Filtered Compressive Sensing for High Resolution Estimation of Anthropogenic Greenhouse Gas Emissions from Sparse Measurements”, Laboratory Directed Research & Development, October 2010 – September 2013.
16. “Bayesian Data Assimilation for Stochastic Multiscale Models of Transport in Porous Media”, Laboratory Directed Research & Development, October 2008 – September 2011.
17. “Risk-based decision making for staggered bioterrorist attacks: Resource allocation and risk reduction in reload scenarios”, Laboratory Directed Research & Development, over October 2007 – September 2009.
18. “Distributed Micro-releases of Bioterror Pathogens: Threat Characterization and Epidemiology from Uncertain Patient Observables”, Laboratory Directed Research & Development, over October 2005 – September 2008.

## Activities and Awards

- Reviewer, *Phys. Fluids, Combust. Theory & Modeling, IEEE Computer Science, Proc. Combust. Inst., International Journal of Uncertainty Quantification, Geophysical Model Development, American Institute of Aeronautics and Astronautics Journal, IEEE Transactions in Nuclear Science, International Journal for Uncertainty Quantification, Journal of Computational Physics, International Journal of Heat and Mass Transfer.*
- Reviewer, *California Energy Commission & National Science Foundation.*
- Serving on organizational committees to identify technical needs/gaps in data analytics, AI/ML, and develop programs to bridge them.
- Awards for the authorship, release and maintenance of software packages, some of them open-source (<http://www.sandia.gov/-jairay/software.html>).
- Best paper award in the “Runtime Systems” category at the 15<sup>th</sup> IASTED International Conference on Parallel and Distributed Computing and Systems 2003 (PDCS03).
- 2-year Excellence Fellowship awarded by the Dept. of Mech. & Aero. Engg., Rutgers University, NJ, in July 1993 for pursuing an M.S.
- Institute Silver Medal, awarded by the Indian Institute of Technology, Kharagpur, August 1992.

## Patents

- “Systems and methods for screen particle source manufacturing and development test data”, Rosalie A. Multari, Jaideep Ray, Lisa Michelle Miller, Paul Girard Cummings, Jr., Robert Ferrizz, Lisa A. Walla, Nishant Bhupendra Patel, Shawn Martin and Curtis Co, US Patent 11,719,727 B1, issued August 8, 2023.

## Open-Source Software

- **PRIME: A modeling framework for partially observed epidemics**, distributed under BSD license at <https://github.com/sandialabs/PRIME>.
- **sparse-msrf: A package for sparse modeling and estimation of fossil-fuel CO2 emission fields**, distributed under BSD license at <http://www.sandia.gov/~jairay>. Accompanying theory in Ray et al, Geoscientific Model Development, 7, 1901-1918, 2014.
- **graphMC: A package for testing the independence of graphs**, distributed under BSD license at <http://www.sandia.gov/~jairay>. Accompanying theory in Ray et al, Journal of Complex Networks, 2014.
- **HODIF**, a library for **H**igh-**O**rders **D**iscretizations, **I**nterpolations and **F**ilters, distributed under BSD license at <http://www.sandia.gov/~jairay>. Accompanying theory in Ray et al, SIAM J. Scientific Computing, 2007, 29(1):139-181.
- **WMDDAC**, a distributed, interactive game for the simulating bioattacks, response and decision support. The package is Sandia-proprietary software. My contribution was in epidemiological modeling.

## Books and Journal Publications

A full list of publications, including presentations and technical reports, can be viewed at <http://www.sandia.gov/~jairay>. Citation statistics are at <http://scholar.google.com/citations?hl=en&user=ojCQQn4AAAAJ>

24. J.C. Lee, H.N. Najm, S. Lefantzi, **J. Ray**, M. Frenklach, M. Valorani, and D.A. Goussis, "On chain branching and its role in homogeneous ignition and premixed flame propagation", Third MIT Conference on Computational Fluid and Solid Mechanics, June 14-17, 2005, Cambridge, MA.
25. B. Norris, **J. Ray**, R.C. Armstrong, L.C. McInnes, D.E. Bernholdt, W.R. Elwasif, A.D. Malony, S. Shende, " Computational Quality of Service for scientific components", Component-Based Software Engineering, 7<sup>th</sup> International Symposium, CBSE 2004, Edinburgh, UK, May 24-25, 2004. Also in Lecture Notes in Computer Science, 3054, Pg 264-271. Springer.

26. **J. Ray** and N. Trebon and S. Shende and R. C. Armstrong and A. Malony, “Performance measurement and modeling of component applications in a high performance computing environment: A case study”, Proceedings of the 18<sup>th</sup> International Parallel and Distributed Computing Symposium , April 26–30, 2004, Santa Fe, NM.
27. J. Steensland and **J. Ray**, “A partitioner-centric model for SAMR partitioning trade-off optimization: Part I”, Proceedings of the 4<sup>th</sup> Annual Symposium of the Los Alamos Computer Science Institute (LACSI04).
28. J. Steensland and **J. Ray**, “A heuristic re-mapping algorithm reducing inter-level communication in SAMR applications”, Proceedings of the 15<sup>th</sup> IASTED International Conference on Parallel and Distributed Computing and Systems 2003 (PDCS03). *Best paper award in the “Runtime Systems” category.*
29. S. Lefantzi and **J. Ray**, “A component-based scientific toolkit for reacting flows”, Proceedings of the Second MIT Conference on Computational Fluid and Solid Mechanics, Boston, Mass. 2003.
30. S. Lefantzi, **J. Ray** and H. N. Najm, “Using the Common Component Architecture to design high performance scientific simulation codes”, Proceedings of the 17<sup>th</sup> International Parallel and Distributed Processing Symposium, April 2003, Nice, France.
31. C.C. Douglas, J. Hu, **J. Ray**, D. Thorne and R. Tuminaro, “Fast, adaptively refined computational elements in 3D”, presented at 2002 International Conference on Computational Science, Part III, April 21th to 24th, Amsterdam, Netherlands. Also in Lecture Notes in Comput. Sc., 2331, pp 774-783, Springer, Berlin, 2002.

### Conference Talks (Unrefereed) and Technical Reports

See the list on my webpage at <https://www.sandia.gov/~jairay>
