

# Jill Hruby Fellowship

## Seeking Applicants!

We are now accepting applications for the Laboratory Director Jill Hruby Fellowship in National Security Science and Engineering. The Hruby Fellowship is one of Sandia National Laboratories' most prestigious postdoctoral fellowships. This fellowship aims to develop women in the engineering and

science fields who are interested in research and technical leadership careers in national security. Jill Hruby is the first woman to have been appointed director of a large, multidisciplinary national security laboratory and has been a driving force for other women at Sandia and across the country to follow careers in technical leadership.

Jill Hruby Fellows have the opportunity to pursue independent research that supports Sandia's purpose: to develop advanced technologies to ensure global peace. In addition to receiving technical mentorship, Jill Hruby Fellows participate in a unique, prestigious leadership development program. To be considered for this fellowship, applicants must display excellent abilities in scientific and/or engineering research and show clear promise of becoming an extraordinary leader. Fellows may work at either of Sandia's principal locations in New Mexico or California.

The fellowship includes full salary for three years, as well as generous travel and research budget. The salary is \$116,800 in New Mexico and \$128,500 in California. All qualified applicants will be considered for this fellowship.

**Deadline: September 12, 2023, 5PM, Mountain Daylight Time.**

## Qualifications We Require

- Ph.D. conferred within the past three years or completion of Ph.D. requirements by commencement of appointment
- Evidence of strong academic achievement, excellent technical accomplishment, leadership and ability to team effectively
- Development and submission of a compelling research proposal in areas relevant to national security:
  - biological sciences; earth, energy and environmental science; engineering sciences; materials and advanced manufacturing; math, computing and information science; nanodevices and microsystems; physical sciences; radiation effects and high energy density sciences
- Sandia National Laboratories Missions ([sandia.gov/missions](http://sandia.gov/missions))
- Ability to obtain and maintain a DOE security clearance, which requires US citizenship
